

Solstice Cloud has expanded from deployment monitoring and analytics to include cloud management. With this expansion, customers can choose between Mersive’s legacy Dashboard product or Solstice Cloud for Pod management. Solstice Cloud has all the benefits of Dashboard with additional capabilities to provide admins an easy method for onboarding and continually managing any number of Solstice Pods. Due to an enhanced user experience with robust capabilities, Mersive recommends using Solstice Cloud; however, the comparison below will help each customer decide which is best suited for their needs.

	<i>Dashboard</i>	<i>Solstice Cloud</i>
		
Requirements	<i>Enterprise Edition Pods</i>	<i>Enterprise Edition Pods Solstice version 4.5 or later</i>
