

## Summary

Crestron AirMedia is a single-user cable replacement add-on to Crestron room systems which are very expensive and inflexible. In comparison, Mersive Solstice is a comprehensive multi-user meeting collaboration platform that's affordable for every meeting space and flexibly integrates with existing investments. As Mersive's sole focus, Solstice offers industry-leading performance and powerful capabilities beyond wireless content sharing, while Crestron AirMedia has limited capabilities and primarily targets vendor lock-in.

**Mersive Solstice**  
**Gen3 Pod Unlimited**  
 \$1,399\*

**Crestron AirMedia**
