

## Solstice Gen3 Pod Enterprise Unlimited vs. Airtame 2

## **Summary**

Airtame® is an inexpensive, single-user wireless screen sharing solution that lacks essential performance, security, and collaboration capabilities needed for professional IT compliance and effective meeting collaboration. As a robust meeting collaboration platform, Mersive Solstice goes beyond wireless content sharing to deliver powerful capabilities, such as unlimited content sharing, agnostic conferencing support, and meeting analytics, to drive more efficient, engaging, and productive meetings.
