

Solstice Gen3 Pod Enterprise Unlimited vs. Barco ClickShare WPS

Summary

Barco ClickShare is an expensive, basic wireless presentation solution that is difficult to scale to a large number of rooms due to network configuration/compliance limitations. Mersive Solstice goes beyond wireless content sharing to deliver powerful capabilities that drive more efficient, engaging, and productive meetings. Solstice is also designed for secure on-network deployment and its software-based, cloud-enabled architecture makes it future-proof and scalable to any number of rooms. Π Π
